

# Comprehensive lubrication and consultancy solutions for industry

exclusive distributor of  
STRUB products in Poland

[www.strub.pl](http://www.strub.pl)

## Service package for industry

Ecol Sp. z o.o. has a package which is a comprehensive lubricant and consultancy solution including: supply of lubricants, oil service, oil diagnostics and training and consulting services.

### Lubricants

Ecol is the exclusive Polish distributor of oils and lubricants made by the Swiss company STRUB.

STRUB + Co. AG Swiss Tribology is a family-owned company with almost 100 years of tradition, producing innovative lubricants for both automotive and various industrial applications. Particularly noteworthy are products for metalworking (machining and forming), anti-corrosive agents, industrial cleaning agents, plastic lubricants and pastes for various applications, products for the food industry, rapidly biodegradable products and a wide variety of speciality products.

In addition to supplying the Swiss market, the products are exported to more than 60 countries. STRUB pays particular attention to close cooperation with the customer, both at the stage of selection and implementation of innovative solutions and their subsequent optimisation, adapting to ever-changing production conditions and customer requirements.

### Oil service

Comprehensive service including supply of lubricants, proper application and collection and transport of used lubricants to a disposal facility.

We use alternative technologies for the removal of ageing deposits, always tailored to the individual requirements of the machine.

We carry out oil changes (transmission and hydraulic oils) using specialised equipment.

We help reduce equipment operating costs by conditioning lubricants using advanced filtration and dewatering.

## Oil diagnosis

The highest standards of our testing unit have been confirmed by obtaining accreditation No. AB 1564, issued by the Polish Centre for Accreditation, as a laboratory operating in accordance with the PN-EN ISO/IEC 17025/2005 standard.

What sets our oil analysis laboratory apart?

- certified diagnosticians (the only in Poland **CLS - Certified Lubrication Specialist issued by STLE**)
- laboratory available 24/7/365
- dedicated test ranges for gears, hydraulics, lubricated systems plastic lubricant
- non-standard markings
- on-line access to reports

## Advice and training

We organise cyclical, dedicated training in the field of:

- basics of lubrication technology
- lubricants used - problems of lubricant operation
- sampling
- interpretation of diagnostic reports
- basic testing (on - site)
- analysis and diagnosis - case study

We also provide consultancy services including:

- lubrication auditing
- tribological consulting
- selection of lubricants
- designing management systems and the organisation of lubricant management in the plant
- training in the scope of lubrication engineering
- interpretation of test results and oil analyses

## About us

Our "core of business" focuses on a complete line of services in the field of outsourcing lubrication of industrial plants, including the supply of lubricants, cleaning and flushing of oil systems and specialised industrial cleaning of installations.

Since our establishment in 1991, we have been a Polish forerunner in modern oil distribution and the provision of specialised lubrication services.
